The Soul of Emptiness

The spirit of emptiness is the spirit of creativity, the hidden force that gives meaning to existence, to the shapes of glass.

This mysterious space hidden within the ceramic vessel, the enigma of an emptiness that we can never hope to embrace and the great desire to inhabit its silent recesses led me to make the sculptures that I am presenting at this exhibition.

A series of glass sculptures follow the internal rhythm of the ceramic pieces. Water, air, a few grains of rice or red-hot coals are what we would normally expect to find inside these pieces, but what we find is glass; its nature, force and transparency allow us to perceive the hidden mystery behind these ceramic pieces.

Pilar Aldana-Mendez, 2010
